Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 7, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Pente, U. S. Patent 1,231,059. Pente teaches a device comprising a front panel 5, a back panel 4 connected to the front panel at fold line 3. The back panels has a first pair of tabs 8 and a second pair of tabs 9, wherein the edges of the tabs 8 align with edges of the tab 11 of the front panel. See figure 3.

3. Claims 20, 22-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Schroeder, U. S. Patent 2,632,268.

4. Schroeder teaches tire insert holder comprising a circular front panel 11, 32, a back panel 12, 34 connected to the front panel, wherein the back panel has tabs 22, 35 and 23, 36 adapted to inserted into the tire. The

opposite sides of the tabs 22, 35 and 23, 36 having a portion that is coplanar with the front panel 11 as indicated by arrows below.

5. With respect to claims 23 and 24, Schroeder teaches the front panel can be made from rigid material such as paper stock or "patent" mounting board and the rear panel can be made from a material having a resiliency such as Kraft or jute mounting board.

Allowable Subject Matter

6. Claims 2-6, 9, 10, 12, 14-17 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten

in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments filed May 23, 2005 have been fully considered but they are not persuasive.

8. With respect to the rejection of claims 1, 7, and 19 as being anticipated by Pente, the applicant argues that Pente does not disclose the tabs of the back panel section are engageable with the tire to hold the front panel in a predetermined position. The applicant points out that Pente is a toy, wherein the tabs 8 and 9 of the back panel of the toy are incapable of engaging a tire so as to hold the front panel 5 in a predetermined position.

9. The examiner contends that applicant does not positively claim the insert in combination with the tire. The examiner contends that tabs 8 and 11 of Pente can engage a tire.

10. The rejection is maintained.

11. With respect to the rejection of claims 20, 22-24 as being anticipated by Schroeder, the applicant argues that Schroeder does not disclose or teach the tabs having at least one edge wherein the edges of at least two of said tabs are coplanar with the edge of the front panel. The examiner

contends that Schroeder teaches that tabs 35 and 36 or end of the strip having portions which are coplanar with the 11, 32 as indicated by the arrows in the copy of figure 1 above. In review figure 6 of the applicant's drawing only a portion of the tabs 30, 30, 50 and 60 are coplanar with the front portion 12. The entire edge of the tabs are not coplanar with the front portion. With this in mind, the examiner contends that the portions pointed out above meets the claimed limitation as understood by the applicant's specification, page 8, lines 2-11 and figure 6.

12. The rejection is maintained.

Conclusion

13. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the

mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
